

Thomas Jefferson Powerpoint Bullets for 6/23/2010
Operational Period 6/22/2010 Sampling Period

- Five stations, TJ57 – TJ61, were sampled during the operational period.
- All stations were sampled for: TPH, VOAs, and oil dispersion (CTD fluoremetry and dissolved oxygen).
- No samples were collected for bioassay using the Rototox test.
- Possible oil dispersion found at 44 meters by Station TJ59.
- TJ60 showed a decrease in DO at 36 meters, with a very slight increase in fluorescence.
